October Quarterly Report (7/1/10 - 9/30/10)

Please be advised this report has been amended to correct the election designation for some of the contributions received by our committee during this reporting period. Upon a review of our records, we discovered an error that occurred. When running this report, our software default settings for the Primary & General were inadvertently transposed. Therefore, this affected the election designation for some of the reported entries previously reported for this period. This amended report now reflects these corrected election designations for all contributions and/or memo entries. Please note, this did not affect the actual election cycle to date totals reported for any of these contributors. Additionally, this amendment does not reflect any additional redesignations from those original contributions. This amendment simply corrects our default settings to now accurately reflect the correct election designation for each contributor's original contribution(s) for this reporting period.
